"CHEAR-Squared" Pilot Funding Opportunity

Introduction:

This funding initiative provides a means to further collaborative research projects between CHEAR Faculty Investigators and our partner school/ colleges and in particular with the CHEAR Faculty Executive Representatives.

Funding Amount: \$20,000

Criteria:

- Requires one CHEAR Faculty Investigator and one <u>CHEAR Faculty Executive Representative</u> (or their designee). For example, a Faculty Executive Representative at the School of Public Health may designate a junior faculty member as their designee for the award.
- To fund summer trainees (student or post-doc) or part-time trainee during academic year, opportunity to fund trainees
- Awardee is expected to present their work through the CHEAR Seminar Series or a seminar series at the collaborating school/ college (e.g. CHEPS) or another similar activity
- Faculty Executive Representatives are deeply connected into health services research at their school/ college, these funds supporting collaborative research projects are a way to formalize inter-school relationships
- Promote innovation: how does this new program advance the science of child health
- Innovative research focused on disparities including socioeconomically disadvantaged and vulnerable populations

Format:

Two-page proposal outlining the goals of the program, collaborating faculty/ research personnel, collaborating units on campus, and a brief description of the budget. The proposal may be a joint application allowing a junior faculty member to include a statement from a mentor putting the proposal activities into context for career goals.

Proposal decisions (approved, revise and resubmit) will be provided to the submitter including the reviewer comments and feedback.

Deadline: Rolling Submissions

Pilot Research Funds

COVID-19 Addendum

To facilitate COVID-19 research efforts, CHEAR Program Funds are available for short term projects if the focus is COVID-19 related activities. The time frame of the project can be up to 12 months and the budget should align with the scope and limited to \$15,000.

The COVID-19 focused short term projects follow the same CHEAR Center Program Fund guiding principles and application process.
